

## Features

- Choice of Automatic and Manual ranges
- Thermocouple, RTD temperature measurement,  
High precision automatic cold junction  
compensation
- Three easy to use data records
- Automatic power off function
- Large screen LCD with white light backlit display
- Computer Interface
- Measuring rate 3/s

### Technical Specification

#### Physical Specifications

### Detailed Accuracy Specifications

All the speculations apply to + 18°C to +28°C, 10% to 70% RH unless stated otherwise.

All speculations assume a 5-minute warm-up period

Standard speculation is valid for one year.

Accuracy specifications are given as " = ([% of reading] + [number of least significant digits])

**Note:** "Counts" refers to the number of increments or decrements of the least significant Digit
