Scientech

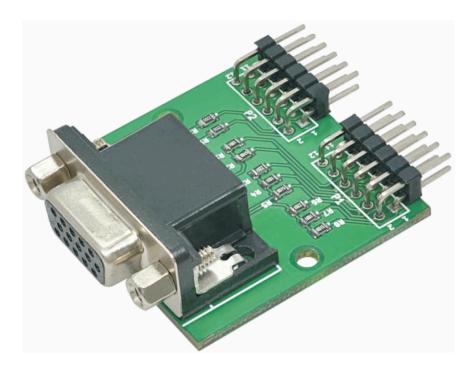

VGA display module provides an easy and cost-effective way to add VGA display to your custom project using a 12pin connector. It is designed to be used with Numato Lab's FPGA boards featuring a 2×6 pin Expansion connector (Boards without 2×6 expansion Connector may need IO breakout modules or manual wiring).

Features

• 8-bit color depth

• Dimension: 38mm X 39mm

Applications

• Learning Prototyping

• Simple game consoles/li>

• Customer information and token display/li>
